FileNet Corporation (NASDAQ: FILE) helps organizations make better decisions by managing the content and processes that drive their business. FileNet's Enterprise Content Management (ECM) solutions allow customers to build and sustain competitive advantage by managing content throughout their organizations, automating and streamlining their business processes, and providing the full-spectrum of connectivity needed to simplify their critical and everyday decision making.

FileNet ECM solutions deliver a comprehensive set of capabilities that integrate with existing information systems to provide cost-effective solutions that solve real-world business problems. Since the Company's founding in 1982, 3,900 organizations, including 80 of the *Fortune 100*, have taken advantage of FileNet solutions for help in managing their mission-critical content and processes.

Headquartered in Costa Mesa, Calif., the Company markets its innovative ECM solutions in more than 90 countries through its own global sales, professional services and support organizations, as well as via its ValueNet[®] Partner network of resellers, system integrators and application developers. FileNet software is currently being used in many State of California agencies and has been named as the enterprise standard in several California County and City governments.

FileNet ECM solutions are designed to give your agency a competitive edge whenever there is a decision to be made by managing all your content; allowing you to create, manage, and activate that content to make better decisions and achieve your business goals; and, most importantly, to bring control and consistency to business processes.

Each of our ECM capabilities emphasizes a different aspect of the ECM framework. But, based on the FileNet P8 architecture, a standards-based, enterprise application compatible technology, each solution is also expandable to include all ECM capabilities as required.

Business Process Manager

Automates, streamlines and optimizes critical business processes by managing the flow of work between people and systems. Establishes a foundation for continuous process improvement by evaluating business performance, and analyzing productivity, efficiency and cycle time and simulating the effect of possible work process changes.

Content Manager

Provides control, access, and sharing of content in a secure and highly scalable environment.

Web Content Manager

Combines easy-to-use Web content management capability with creation, approval and publication of Web content and complex documents to multiple Web sites, in multiple formats and languages.

Image Manager

Provides secure and permanent storage and management of enterprise-level volumes of fixed information and other unstructured content.

Forms Manager

Provides everything needed to easily design, deploy and process electronic forms (eForms) across the enterprise to speed business decisions.

Records Manager

Allows organizations to securely capture, declare, classify, store and dispose of both electronic and physical records.

Report Manager

Maximizes access to legacy data by securely capturing and storing computer output and print stream data.

And much more.... Including capture tools, portal integration and connectors to CRM and ERP systems.
